#### REMARKS

The undersigned acknowledges the courteous treatment received during the course of a telephone interview held on this date with Examiner Stephen Castellano who is now the Examiner assigned to this application.

The undersigned pointed out how claim 6 as amended distinguishes over Abrums and Sponholtz.

The Examiner raised a number of questions with regard to proper antecedent basis for the use of the term "container" in the last line of par. d of the claim. This has been corrected. A question was also raised about whether the wall of the container was "without any channel" as the space between the two lips can be construed as a channel. This has been corrected by changing the language to read "said wall having a smooth surface between said first and second lips".

The Examiner also raised the question whether there was proper support in the specification for the phrase "the color on said container being limited to said second lip". This has been changed, at the suggestion of the Examiner, to "at least one of said containers having a color different from any of the other containers", taken from page 34, second paragraph, of the specification.

The undersigned expresses appreciation for the suggestions offered by the Examiner.

It is understood that an updated search will be conducted.

The undersigned or Mr. Kroll should be called in the event further changes are to be made to obtain allowance of the application.

A favorable action is solicited.

Respectfully submitted,

Norris
